

3PL

Who we are

3PL is building an enduring company, doing fulfilment and logistics with a difference, and creating a platform for brands to reach more customers. We put the customer at the centre of everything we do.

Omnichannel Fulfilment | 3pl

Omnichannel fulfilment is a strategy where the business's goal should be to be flexible enough to sell more products through more channels to a growing number of consumers around the globe. By working with 3PLs, you can shorten your click-to-customer cycle time and seamlessly sell and ship products across your web, social, mobile, and physical storage platforms.
