Possible Duplicate: JavaCC - what does "-" mean in tokens What does this "-", do? In the language grammar the - just follows token and I didn't find it on the list of token... A: From the specification: (...) It must be followed by a token. If it is not preceded by a regular character, it can be followed only by a line comment. (...) A: The - signifies that it is a lexical rule. This is from the JavaCC grammar link that @ChrisRiddle has posted above: /- {c= c c } | {c= c c } | {c= c c } Samsung SGH-i690 The Samsung SGH-i690 or Samsung i690 was a smartphone manufactured and sold by Samsung (then Samsung Mobile) from 2003 to 2004. Designed as an analogue to the popular 3-way flip phones such as Motorola 3-way and Sony Clié, Samsung released the i690 as a low-end handset. Its flip design, however, was not adopted by the British market. The i690 had a 4 line LCD screen and came with an inbuilt digital camera with 2.0 megapixel. The phone also had an integrated MP3 player with a built in phonebook. The phone was marketed with a unique 3-tone sound-style, which is somewhat similar to the Nokia 1100/1250/1275/1280/1290 (which were actually been the same phone in a different region) music player, and has a slight drenched metallic feel that's quite different from the more plastic-feeling Samsung pagers of the past ba244e880a
