

Infinity Sewing Limited

I created Infinity Sewing in 2019 with over 12 years of experience in the sewing and textiles sector, with the goal of channeling my passion and experience into a respected supplier of industrial sewing machines and equipment.

Blind Hemming Machine **| Infinity Sewing Limited**

Blind hemming machine is a type of stitching machine that guarantees the quality of clothes, especially skirts and trousers. With this machine, it is possible to shorten clothing without cutting it. To do this, stitch up a single layer from the wrong side, and then turn the garment over to see how well it fits. The blind hemming machine has a special design for sewing a blind stitch.
