

How to Clear Cache on iPhone

As we browse Safari and use a number of applications, we accumulate a lot of garbage along the way, which causes our device's cache to fill up with a large number of unnecessary files. The cache on your iPhone is a designated area inside the device that stores temporary data and may assist in making webpages and applications load more quickly. However, it may also eat up your storage space, so if you are eager to know [How to Clear Cache on iPhone](#), Mobbitech has a simple guide with step-by-step instructions on how to get rid of all the garbage that has accumulated in your browser.
